

I would just like to take a moment to show my support for this proposal. It seems to be the best designed of all the petitions that have been filed over the last year or so concerning license restructuring as well as the morse code requirements. It think this proposal will best serve both sides of the Amatuer radio community which continues to degrade into constant bickering over the removal of morse code. I also further believe this plan will help encourage newcomers to the hobby which would be a benefit to all involved with the hobby.
